

Alexandre DO-O ALMEIDA

Lead AI Software Engineer

Montpellier, France · Remote alexandre@zqsdev.com LinkedIn / alexandre-dooalmeida GitHub / aleqsd

SUMMARY

10 years building software: helped scale Jam.gg (Y Combinator S20) to **2M users**, delivered AI to **50K students**, and built PlayStation automated testing for **5,000+ games**. I orchestrate Codex and Claude Code agents for autonomous implementation, testing and review, owning architecture and release quality.

148B+ tokens · Ranked #17 worldwide on VibeRank in September 2026

EXPERIENCE

- studi

Lead AI Software Engineer

Apr 2026 - Present

Studi · Galileo Global Education

- Delivered a RAG-based course-support assistant to production for **50,000 students**, using LLMs, LangChain and Langfuse for retrieval, evaluation and observability.
 - Partner directly with the **CEO** to lead R&D and engineering transformation at an 800-person education company.
 - Lead a full LMS rebuild and videoconferencing platform development, owning architecture and guiding developers through implementation and delivery.
- SONY

DevOps Engineer / Test Automation Infrastructure Lead

Feb 2023 - Mar 2026

Sony Interactive Entertainment · PlayStation

- Built CI/CD and automated testing for PlayStation emulators with Python, GitHub Actions and AWS, covering **5,000+ games** across console devkits and operating environments.
 - Supported release quality for **50+ PlayStation Classics** on PS4/PS5 reaching **millions of players**; maintained pipelines used by **15+ engineers**. Engagement via Implicit Conversions.
- jam

Founding Engineer / Product & QA Lead

Mar 2020 - Mar 2023

Jam.gg · formerly Piepacker · **Combinator** S20

- Part of the founding team that scaled a cloud gaming platform to **2M users and 500K MAU** as the company raised a **\$12M Series A**.
 - Shipped backend, frontend and cloud systems with Go, TypeScript, React, Firebase and GCP, including Discord/Twitch integrations, browser streaming and game catalog systems.
 - Created and led Product and QA teams; helped recruit the **first 30 hires** as the company grew to **60+ employees**.
- Atos

AI & IoT Lead / Backend Engineer

2018 - 2020

Atos. Led 6 developers on Azure predictive maintenance; built Java geolocation systems for the French Army.
- AIRBUS

R&D Software Engineer

2016 - 2018

Airbus Helicopters. Built Unity VR/AR simulators using Vive and HoloLens for technician training; earlier Java backend engineering on helicopter documentation software.
- cnrs

Bioinformatics Engineer Intern

2016

CNRS. Extended Java tools for genomic structure analysis, sequence alignment and phylogenetic visualization.

TECHNICAL SKILLS

- Languages & Frameworks

Go · TypeScript · React · Python · Java · SQL · Rust · C++ · C# · WebAssembly
- AI & Agents

Multi-agent Orchestration · Codex · Claude Code · RAG · LangChain · Langfuse · AI evaluation
- Cloud & Infrastructure

Infrastructure as Code · GCP · AWS · Firebase · Docker · Kubernetes · GitHub Actions · CI/CD

EDUCATION

- Master's in Data Science & Software Engineering · Ingesup / Aix Ynov Campus · 2016-2019
- BSc, Cell & Molecular Biology · Aix-Marseille University · 2013-2016
- French: native · English: full professional proficiency, TOEIC 990/990
