

Alexandre DO-O ALMEIDA

Lead AI Software Engineer

Agentic AI · Founding Engineer (YC S20) · Sony PlayStation

Montpellier, France · Remote alexandre@zqsdev.com LinkedIn / alexandre-dooalmeida GitHub / aleqsd

SUMMARY

10 years building software: helped scale Jam.gg (YC S20) to **2M users**, delivered AI to **50K students**, and built PlayStation automated testing for **5,000+ games**. I orchestrate Codex and Claude Code agents for autonomous implementation, testing and review, owning architecture and release quality.

EXPERIENCE

- 

Studi / Galileo Global Education Apr 2026 - Present

Lead AI Software Engineer

 - Delivered a RAG-based course-support assistant to production for **50,000 students**, using LLMs, LangChain and Langfuse for retrieval, evaluation and observability.
 - Partner directly with the **CEO** to lead R&D and engineering transformation at an 800-person education company.
 - Lead a full LMS rebuild and videoconferencing platform development, owning architecture and guiding developers through implementation and delivery.
- 

Sony Interactive Entertainment / PlayStation Feb 2023 - Mar 2026

DevOps Engineer / Test Automation Infrastructure Lead · via Implicit Conversions

 - Built CI/CD and automated testing for PlayStation emulators with Python, GitHub Actions and AWS, covering **5,000+ games** across console devkits and operating environments.
 - Supported release quality for **50+ PlayStation Classics** on PS4/PS5 reaching **millions of players**; maintained pipelines used by **15+ engineers**.
- 

Jam.gg (formerly Piepacker) · Y Combinator S20 Mar 2020 - Mar 2023

Founding Engineer / Product & QA Lead

 - Part of the founding team that scaled a cloud gaming platform to **2M users and 500K MAU** as the company raised a **\$12M Series A**.
 - Shipped backend, frontend and cloud systems with Go, TypeScript, React, Firebase and GCP, including Discord/Twitch integrations, browser streaming and game catalog systems.
 - Created and led Product and QA teams; helped recruit the **first 30 hires** as the company grew to **60+ employees**.

EARLIER EXPERIENCE

- Atos** · Backend Engineer / AI & IoT Lead. Led 6 developers on Azure predictive maintenance; built Java geolocation systems for the French Army. 2018 - 2020
- Airbus Helicopters** · Built Unity VR/AR simulators for technician training (Vive, HoloLens); earlier Java backend engineering via Reactis (2016-2017). 2016 - 2018
- CNRS** · Bioinformatics Engineer Intern. Extended Java tools for genomic structure analysis, sequence alignment and phylogenetic visualization. 2016

TECHNICAL FOCUS

- Software

Go · TypeScript · React · Python · Java · SQL · Rust · C++
- AI & agents

Codex · Claude Code · RAG · LangChain · Langfuse · AI evaluation
- Cloud & delivery

GCP · AWS · Firebase · Docker · Kubernetes · GitHub Actions · CI/CD

EDUCATION & LANGUAGES

- Master's in Computer Engineering** · Aix Ynov Campus / Ingesup · 2016-2019

BSc, Cell & Molecular Biology · Aix-Marseille University · 2013-2016

French: native · English: full professional proficiency, TOEIC 990/990
