

Alexandre DO-O ALMEIDA

Lead AI Software Engineer

Agentic AI · Founding Engineer (YC S20) · Sony PlayStation

Montpellier, France · Remote alexandre@zqsdev.com LinkedIn / alexandre-dooalmeida GitHub / aleqsd

SUMMARY

10 years building software: helped scale Jam.gg (YC S20) to **2M users**, delivered AI to **50K students**, and built PlayStation automated testing for **5,000+ games**. I orchestrate Codex and Claude Code agents for autonomous implementation, testing and review, owning architecture and release quality.

148B+ tokens · Ranked #17 worldwide on VibeRank in September 2026

EXPERIENCE

	Lead AI Software Engineer Studi · Galileo Global Education	Apr 2026 - Present
- Delivered a RAG-based course-support assistant to production for 50,000 students, using LLMs, LangChain and Langfuse for retrieval, evaluation and observability. - Partner directly with the CEO to lead R&D and engineering transformation at an 800-person education company. - Lead a full LMS rebuild and videoconferencing platform development, owning architecture and guiding developers through implementation and delivery.		
	DevOps Engineer / Test Automation Infrastructure Lead Sony Interactive Entertainment · PlayStation	Feb 2023 - Mar 2026
- Built CI/CD and automated testing for PlayStation emulators with Python, GitHub Actions and AWS, covering 5,000+ games across console devkits and operating environments. - Supported release quality for 50+ PlayStation Classics on PS4/PS5 reaching millions of players; maintained pipelines used by 15+ engineers. Engagement via Implicit Conversions.		
	Founding Engineer / Product & QA Lead Jam.gg · formerly Piepacker · YC S20	Mar 2020 - Mar 2023
- Part of the founding team that scaled a cloud gaming platform to 2M users and 500K MAU as the company raised a \$12M Series A. - Shipped backend, frontend and cloud systems with Go, TypeScript, React, Firebase and GCP, including Discord/Twitch integrations, browser streaming and game catalog systems. - Created and led Product and QA teams; helped recruit the first 30 hires as the company grew to 60+ employees.		
	AI & IoT Lead / Backend Engineer · Atos. Led 6 developers on Azure predictive maintenance; built Java geolocation systems for the French Army.	2018 - 2020
	R&D Engineer · Airbus Helicopters. Built Unity VR/AR simulators for technician training (Vive, HoloLens); earlier Java backend engineering via Reactis (2016-2017).	2016 - 2018
	Bioinformatics Engineer Intern · CNRS. Extended Java tools for genomic structure analysis, sequence alignment and phylogenetic visualization.	2016

TECHNICAL FOCUS

Software	Go · TypeScript · React · Python · Java · SQL · Rust · C++ · C# · WebAssembly
AI & agents	Multi-agent Orchestration · Codex · Claude Code · RAG · LangChain · Langfuse · AI evaluation
Cloud & delivery	Infrastructure as Code · GCP · AWS · Firebase · Docker · Kubernetes · GitHub Actions · CI/CD

EDUCATION & LANGUAGES

Master's in Computer Engineering · Aix Ynov Campus / Ingesup · 2016-2019
BSc, Cell & Molecular Biology · Aix-Marseille University · 2013-2016
French: native · English: full professional proficiency, TOEIC 990/990
